

MEGAN Hollway - 431846667.

My name is Colleen Hollway, I am first a first a mother to Megan Hollway my youngest daughter. I am her career second, over the passed 8 weeks of trialling the Bioness L300 Go Functional Electrical Stimulation. I have watched my daughter 36 years year old, low self-esteem, barely mobile, unstable, anxious, depressed. Wake up, shower herself, get dressed and coming outside with a smile wanting to walk. I have watched her push herself, her confidence grow a glimmer of hope in her eyes. While it was a hard 8 weeks mentally for her, and we had many tears, struggles, self doubt, anxious. She pushed it aside an was determined to make it work. Megan begun to smile, she spoke with happiness in her face. I saw my daughter back to her happy self. I watched her participate in family outings instead of excluding herself with fear. While it was still a challenge she was tackling it head on with a new found belief, she could do it, even when extremely exhausted she wouldn't give up until she saw her limits. The last week of trial she spoke with doubt, questioned herself, she slowed down because she knew she would have to do it on her own again. The Bioness L300 Go Functional Electrical Stimulation gave my daughter 8 weeks of hope, smiles, confidents I will forever be thankful for giving my daughter back her smile.

COLLEEN HOLLWAY.
